Assignment - 1

U19CS012

1.) Create the directory and files for the following structure and write single UNIX command for each given instruction:

```
bhagya@bhagya-VirtualBox:~$ ls
Desktop  Documents  Downloads  Music  Pictures  Public  Templates  Videos
bhagya@bhagya-VirtualBox:~$ cd Desktop/
bhagya@bhagya-VirtualBox:~/Desktop$ mkdir Departments

2. Assume that you are in Departments directory. Write a command to copy m1.c of UnixOs directory to DM directory.

Command:

When only the directory name is specified as a destination, the copied file has the same name as the original file.

```
cp COED/unixOS/m1.c MECHANICAL/DM/
```

OR

```
cp COED/unixOS/m1.c MECHANICAL/DM/m1.c
```

```
bhagya@bhagya-VirtualBox:~/Desktop/Departments$ cp COED/UnixOS/m1.c MECHANICAL/DM/m1.c
```

Output:

```
cp Src_file Dest_file
```

If the 2nd file doesn't exist, then first it creates one and content is copied to it. But if it existed then it is simply overwritten without any warning. So be careful when you choose destination file name.

3. Assume that you are in Data Structure directory. Write a command to copy file e2 from ATTE to LM.

Command:

```
cp ../../ELECTRICAL/ATTE/e2.b ../../ELECTRICAL/LM/e2.b
```

```
bhagya@bhagya-VirtualBox:~/Desktop/Departments$ cd COED/DataStructure/
bhagya@bhagya-VirtualBox:~/Desktop/Departments/COED/DataStructure$ cp ../../ELECTRICAL/
ATTE/e2.b ../../ELECTRICAL/LM/e2.b
```

Output:

4. Assume that you are in HMT directory. Copy all files of HMT directory, having 3 characters filename, to MP directory.

Command:

```
cp COED/unix0S/m1.c MECHANICAL/DM/
```

```
bhagya@bhagya-VirtualBox:~/Desktop/Departments/MECHANICAL/HMT$ cp ???.* ../MP/
```

Output:

5. Assume that you are in Departments directory. Copy all files of COED directory having first character "c" in name to CAEE directory.

Command:

```
cp COED/*/c*.* ELECTRICAL/CAEE/
```

Output:

```
bhagya@bhagya-VirtualBox:~/Desktop/Departments$ cp COED/*/c*.* ELECTRICAL/CAEE/

6. Change the name of file tp.c of DM to ctp.c.

Command:

```
mv tp.c ctp.c
```

If the destination file **doesn't exist**, it will be created. In the above command **mv** simply replaces the source filename in the directory with the destination filename (new name). If the destination file **exist**, then it will be **overwrite** and the source file will be deleted. By default, **mv** doesn't prompt for overwriting the existing file, so be careful!!

Output:

```

7. Rename e1.b to e1.c.

Command:

```
mv e1.b e1.c
```

Output:

```
bhagya@bhagya-VirtualBox:~/Desktop/Departments/MECHANICAL/DM$ cd ../../ELECTRICAL/ATTE/

├── e2.b
└── e3.b
```

8. Delete file having second char. p of HMT directory.

Command:

```
rm ?p*.*
```

rm stands for **remove** here. **rm** command is used to remove objects such as files, directories, symbolic links and so on from the file system like UNIX. To be more precise, **rm** removes references to objects from the filesystem, where those objects might have had multiple references (for example, a file with two different names). **By default, it does not remove directories.** This command normally works silently and you should be very careful while running **rm** command because once you delete the files then you are not able to recover the contents of files and directories.

Output:

```

bhagya@bhagya-VirtualBox:~/Desktop/Departments/ELECTRICAL/ATTE$ cd ../../MECHANICAL/HMT

11. You are in MP Directory, display the current directory path.

Command:

`pwd`

pwd stands for **Print Working Directory**. It prints the path of the working directory, starting from the root.

Output:

What is Lorem Ipsum?

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Page Break 1

Why do we use it?

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).

Page Break 2

Page Break 2

Where does it come from?

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintock, a Latin professor at Hampden-Sydney College in Virginia, looked up one of the more obscure Latin words, consectetur, from a Lorem Ipsum passage, and going through the cites of the word in classical literature, discovered the undoubtable source. Lorem Ipsum comes from sections 1.10.32 and 1.10.33 of "de Finibus Bonorum et Malorum" (The Extremes of Good and Evil) by Cicero, written in 45 BC. This book is a treatise on the theory of ethics, very popular during the Renaissance. The first line of Lorem Ipsum, "Lorem ipsum dolor sit amet..", comes from a line in section 1.10.32.
